The State Democratic Convention will be held in Columbia on the third Wednesday in May next for the purpose of reorganizing the Democratic party of the State.

The difference between the Cubans and the Spaniards is, one is fighting ter a God given principle and the ther for selfish motives. Right will prevail and Cuba will be free.

The advice to Southern farmerto plant for a plentiful food supply this year cannot be reiterated too ften. The farmer who heeds it will be happy next winter, while the farmor who disregards it will bemoan his fate, especially if there be war.

- The war talk continues to be of an exciting nature and the whole country is anxiously awaiting the report of the board of inquiry as to the Maine disaster, which will probably be made this week. It looks like everybody is ready to fight, and everybody is fully confident of the strength and ability of the Federal government to amply protect its coast line. It is well understood. however, that President McKinley will not make war on Spain unless he is forced to it by an overwhelming public sentiment, and it ought to be equally well understood that Senor Sagasta will not make war on the United States unless he is forced to do so by the officers of the Spanish army in Madrid, who seem to tion should be provided, that they should have the power of bringing irresistible pressure to bear at critical occasions upon the Spanish Government. Is the English language destined to | become universal? This question is enable them to attend, will be apt to suggested by the marvelous growth which has characterized the language since the beginning of the present century. While there were only some 21,000,000 people who spoke the English language at the beginning of the century, there are now some 130,000 . 000. These English-speaking people are not restricted to Great Britain and America, but are scattered about over the entire globe. As compared with other languages the growth of our mother tongue is all the more signifieant. At the beginning of the century the world's most popular lan-guage was French, which was spoken by 31,000,000 people. As to the others. German was spoken by 30,000, 000 people, Russian by 30,000,000. Spanish by 27,000,000, English by 21. 000,000 and Italian by 16,000,000. At the present time English is the language of 130,000,000 people, Russian of 75,000,000, German of 70,000, occurrence of 150,000,000, German of 70,000, occurrence of 150,000,000, Spanish of 14,000,000 and Italian of 25,000,000. According to these figures the English language has mounted during the present century from the fifth place to the first, and is to-day spoken by mearly five times as many people as spoke it in 1800. While the various other languages have made some progress during this period, they cannot begin to compare in point of growth with the English.

ON and after April 1st I will adopt the "Coupon System" of selling Goods. The Coupon Book System is the only correct way, according to my opinion, of conducting a small retail business. The passbook is out of date. Coupon Books are used the same as mileage books so universally used by all Railroad Companies.
